

**VibeAway™**, produced by B Green Innovations, is made from **100% recycled tire rubber**. It is made in the USA and is solving the **vibrating and walking washing machine problem experienced when installed on framed floors**.

**VibeAway™** is designed to outperform the competition on all levels; **size, material composition, design functionality, and price**.

- The **size** allows more material with a **bigger footprint** to absorb the vibration. It is 3.5 inches in diameter by 1 inch (actual height is  $\frac{3}{4}$  inch because of recess).
- The **material** is **solid recycled rubber** which is the **best vibration** insulating material (your car engine is mounted on solid rubber motor mounts).
- The **design** features a **recess built into the top** for the feet of the machine to sit in, locking in the machine at all four corners (and it is easily installed).
- The **price** is **33% less than** a competitor's small square pad.

#### Facts Regarding Scrap Tires

(Source: EPA's Scrap Tire Cleanup Guidebook, released June 8, 2006)

- Approximately **290 million automobile and truck used tires are discarded** by Americans every year
- Large scrap tire stockpiles present a **risk to human health** and the environment
- Discarded tires provide an ideal **breeding ground for disease-carrying mosquitoes and rodents**
- Stockpiles can **catch fire** as a result of lightning strikes, equipment malfunctions or arson resulting in state, federal and local agencies spending tens of millions of dollars over the past few decades responding to tire fires.

**VibeAway™ is the only product on the market that solves washing machine vibration and walking problems while simultaneously providing a direct environmental benefit!**

### PREFERRED VENDOR PROGRAM

Cases	Case Price
Any Quantity	<b>Introductory Special!*</b> \$143.00 (\$11.92/pack)
1-150	\$153.00 (\$12.75/pack)
